# Clinker bricks

MELBOURNE / red smooth / 16

MELBOURNE / red corrugated / 26

## WIDE OFFER

Röben Polska offers 22 models of clinker manufactured in the factory in Środa Śląska and a rich assortment of imported products. Apart from standard bricks, the clinker product system includes lining bricks, full and formed bricks, tiles and angular tiles, which allows to perform even the most demanding projects.

### Technical data according to PN EN 771-1:2011

total perforation area	> 15% ≤ 50%	
external wall	21 mm	
volumetric density	1500 kg/m <sup>3</sup>	
characteristic strength	NF:	≥ 35 N/mm <sup>2</sup>
	VNF:	≥ 45 N/mm <sup>2</sup>
absorbability	up to 6%	
frost resistance	category F2	
acid- and lye-resistance	yes	
heat conductivity coefficient	brick NF:	P = 50% - 0,37 W/mK
		P = 90% - 0,43 W/mK
	brick SP and 7-S:	P = 50% - 0,45 W/mK
		P = 90% - 0,51 W/mK
	brick VNF:	P = 50% - 0,62 W/mK
		P = 90% - 0,69 W/mK

# Bindings of bricks in the wall

# Formed bricks

## PERFECT FINISHING

Formed bricks by Röben allow to make architectonic details in the case of public utility facilities, facades of detached houses, as well as fences and other small architecture elements.

## Hoods for posts

- dimensions 42 x 42 x 9 cm and 30 x 30 x 8.5 cm
- waterproof concrete core
- sold without joints to be individually fitted by the investor

## Ceramic hoods

Available colours: brown, red

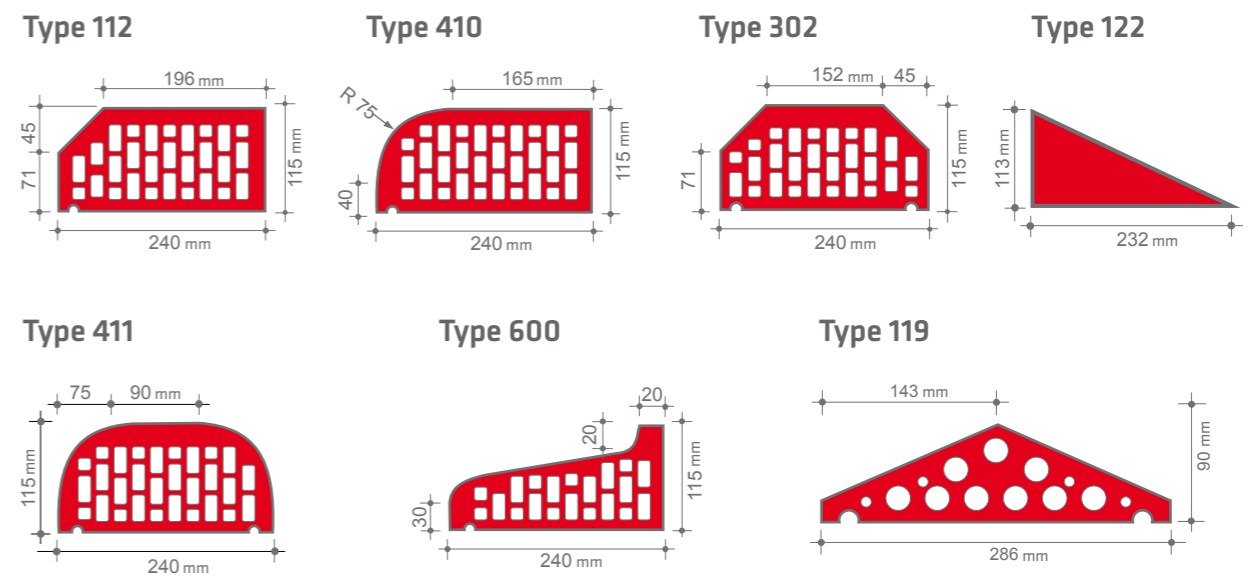

## Hoods made of clinker bricks

Available colours correspond to the system offer of bricks NF-SP

## Offer of standard formed bricks

/non-standard shapes are made upon a special order/

# Factory

Production facilities in Środa Śląska

Röben is a part of a family-owned concern that has been manufacturing ceramic building materials for **more than 160 years**. The Frisian brickyards, established in the mid-19th century, are what today's chain of factories located in Europe and America originated from. In 1995 the factory in Środa Śląska became a part of the company cherishing such a long-established tradition. This is where the largest and the most modern roof tile factory in Europe was established.

There are many factors that contributed to Röben's success. From local deposits of clay we extract a perfect raw material for the production of bricks, clinker tiles, roof tiles and roof accessories. This natural ceramic raw material, combined with the most modern technological solutions and long experience, provides for the highest quality of the building materials manufactured in our factories. They enable further generations of investors to make the dreams of a beautiful and safe home come true. The best technical parameters, strength, an attractive design and a good price constitute a logical whole.

PN-EN 1304: January 2013 ceramics. Definition and specification of products Annex B. In case of uncoloured roof tiles the shades of the colour may differ, which stems from specific methods of the production of ceramic products. The product colours presented in the catalogue are for demonstrative purposes only and their shades may differ from the real colour of the products. Röben shall bear no liability for any differences between the real colour of the product and the colour presented in the catalogue.
